Thanks. I'll try to get to the bottom of this on Tuesday.

Yes, Elon holds 100% of the power and authority regarding the building. When OpenAI first moved in he made it clear that he wanted them to stay only on the first floor. He was earmarking the other spaces for Neuralink. It's possible Greg had a sidebar conversation with him about using other spaces. He may have casually approved not knowing they were planning on moving forward.
