Subject: Decisions and Notes

Hey guys!

Productive meeting. Ran 5:30-7:30ish I think(?) so contentful discussion.

OpenAI:
-switch to for profit in next couple of weeks (woah, fast!)
-retain .org, add .com
-keep a subset of people at OpenAI non-profit, likely safety and regulation oriented, but E wanted some coders there too
-unclear where DoTA 5v5 IP will reside yet
-messaging around for profit is need equity to retain true AI talent, need money for hardware
-all hands on deck 5v5
-**Elon and Sam A to lock down server agreement with Satya, unclear who will take lead but likely Sam**
Context is after E and Satya talked, Satya's team offered a shitty deal. This may involve both Jensen and Satya to get to the right deal but likely Satya first.
-Thinks OpenAI team way too enamored with Cerebras. Isn't opposed to something in time but thinks they need to be more measured and less dupeable.
-Ran my Andrew Feldman meeting by him and he was cool with it so will report back on that Monday.

Neuralink:
-Hm. Sam A thinks Max is a disaster (said those words) and has duped me and everyone else (said in front of Elon). This clearly has transcriptic roots but he told me if I don't think Max is gunning to be CEO he's duped me. (Please don't repeat outside of Elon)
-**Emma -- Elon confirmed he 100% wants to do movie. I tried to offer option out but his take was he wants to see the new cut anyway and is concerned that he doesn't have enough feedback yet**
-We talked org structure. He knows it's a problem and will think on it. No short term to do.
-Wants to figure out how to productively spend more time since he thinks it's only way to AGI future (this is tricky because both he doesn't have the time and Neuralink still doesn't know how to use him well)

Neil Strauss:
-**He says no to Neuralink, yes to OpenAI. Who should be setting expectations with Nick?**
